Moelven GRI index – 2021

The Global Reporting Initiative (GRI) is a network-based organization, which is behind the development of the world's most widely used framework for sustainability reporting. The GRI framework contains principles, themes and indicators that can be used by organizations to measure and report economic, environmental, and social performance.

Moelven reports in accordance with the framework GRI Standards 2020: Core option. The table below presents Moelven's reporting in relation to the guidelines in GRI Standards 2020. For more details about GRI, see www.globalreporting.org.
