Instructions to our transporters on
SAFETY PROCEDURES
related to loading and unloading at
Moelven Timber and Wood companies

In order to ensure safety during loading and unloading, the following safety procedures apply:

- High visibility clothing, protective goggles, helmets and protective footwear are mandatory.
- The driver get a loading or unloading location from the office or forklift driver. Passengers must not leave the vehicle.
- Before unloading, the load must always be checked for any displacement before straps are loosened, and if necessary loads must be secured using a forklift before straps are released.
- Handling of straps must only take place when forklift is stationary or at a safe distance.
- Forklifts always have right of way in the area. The driver must stay within sight of the forklift driver to achieve eye contact.
- It is strictly forbidden to stay close to or underneath loads during loading/unloading.
- Loads must be secured in accordance with regulations before leaving the loading area.

We want to get you HOME IN ONE PIECE!
